

QUICK START GUIDE

Satellite Images

SCI-3100

1. You must install Google's Earth Software

If your computer is more than 2 years old, then Google Earth may run slow or not at all on your computer. Go to <http://earth.google.com/support> for more information on running Google's Earth software.

Step 1	Go to http://earth.google.com/download-earth.html and click on the "Download GoogleEarth.exe" button. Save the File to your desktop.
Step 2	Double click the file that you just downloaded and follow the on screen steps to begin the installation of Google Earth.

2. Viewing Tracking Data in Google Earth

Step 1	Open or download tracking data from your SCI-3100 series unit using the SkyTRX software.
Step 2	In the icon bar at the top of the screen, click the icon denoted with a globe (Third Button).
Step 3	Google Earth will now automatically launch and your tracking information will be displayed. HINT: MAKE SURE YOU PUT A CHECKBOX NEXT TO "ROADS" IN THE LAYERS WINDOW.

Basic Google Earth Controls

The diagram shows the navigation controls for Google Earth, including buttons for rotating the view counter-clockwise and clockwise, a central directional pad for up, down, left, and right movement, zoom in/out buttons, and tilt forward/backward buttons for 3D viewing.

The screenshot shows the 'Places' window with a list of tracking stops:

- Arrived on Thursday, October 20, 2005 at 05:20:28pm. Stopped for 3 Hours 33 Min 21 Sec. [Stop #25](#)
- Arrived on Thursday, October 20, 2005 at 09:08:08pm. Stopped for 12 Hours 13 Min 29 Sec. [Stop #26](#)
- Arrived on Friday, October 21, 2005 at 09:37:07am. Stopped for 6 Min 20 Sec. [Stop #27](#)
- Arrived on Friday, October 21, 2005 at 10:09:01am. Stopped for 3 Hours 53 Min 35 Sec.

Double Click on the Stop # to zoom in to that location
